

## Fluency

1 Match the coins to their value.

10p

1p

5p

2p

## Word Problem

2 Jim wants to buy a candy for 1p. Circle the coin that he can use to buy the candy.

3 Emma used a 2p coin and a 5p coin to buy a pencil. Circle the coins she used.

## Reasoning

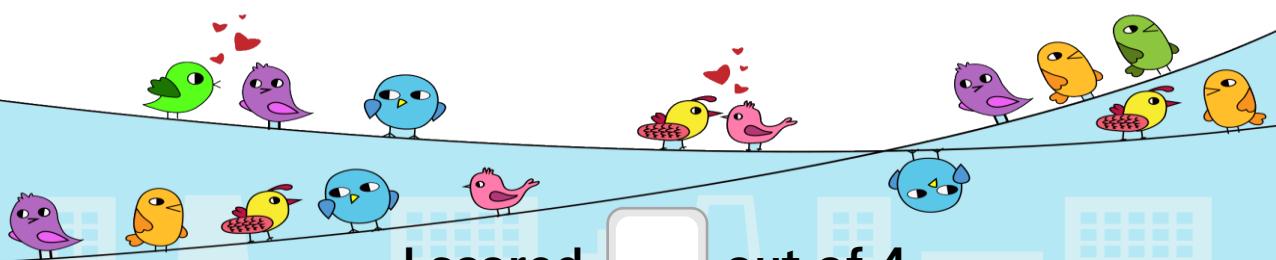

4 Peter has two coins in his pocket. They total 6p.

His friend Zara says,

Peter must have a 4p coin and 2p coin.

Do you agree? Explain your answer.

I scored  out of 4
