

Fluency

- 1** Subtract the smaller number from the bigger one:

$$\square - \square = \square$$

$$\square - \square = \square$$

Word Problem

- 3** Two fish blew bubbles together and made 50 bubbles!
If one fish made 27 bubbles, how many did the other fish make?

50		<input type="text"/>
27	?	

- 4** A box has 42 crayons. If 18 crayons are used, how many are left in the box?

Reasoning

- 5** A wizard added $30 + 15$ to make 45.
Now he changes one spell: adds 1 more to the first number and takes 1 from the second.
What number will appear this time—and why does the magic still work?
