

## Fluency

**1** Subtract from 10s:

$$\begin{array}{r} 50 \\ - 7 \\ \hline \end{array}$$

$$\begin{array}{r} 90 \\ - 3 \\ \hline \end{array}$$

**2** Adding ones:

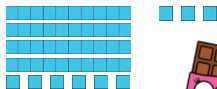

$72 + 6 = \square$

$54 + 2 = \square$

## Word Problem

**3** Emma has 46 chocolates. She gets 3 more. How many now?

$46 + 3 = \square$

**4** Mr Teddy has 38 roses. He got 2 more roses from his friend. How many roses does he have in total?

## Reasoning

**5** Look at this pattern:

$a. 30 - 4 = 26 \quad b. 40 - 4 = 36 \quad c. 50 - 4 = 46$

Explain the pattern by solving the following:

$60 - 4 = \square$

$e. 80 - 4 = \square$
