

## Fluency

**1** Count & write:

$$\square + \square = \square$$

$$\square + \square = \square$$

**2** What comes next:

a. 15, 16, 17, 18,

b. 9, 10, 11, 12, 13,

## Word Problem

**3** There are 10 eggs in a box and 6 eggs on the table. How many eggs are there altogether?

$$\square + \square = \square$$

**4** Mia has 10 red balloons and 4 blue balloons. How many balloons does Mia have in total?

$$\square + \square = \square$$

## Reasoning

**5** Different ways:

Choose 3 different numbers that can go in the boxes so the number sentence stays true. Explain how you know each number works.

a.  $10 > \square + 6$       b.  $10 > \square + 6$       c.  $10 > \square + 6$
