

Fluency

1 Complete the table:

Shape	Sides	Vertices	Draw it
triangle			
square			
pentagon			
hexagon			
circle			

2 Sort these shapes.

- Fewer than 5 sides _____
- 5 or more sides _____

Word Problem

3 Mia draws a shape with 3 straight sides and 3 vertices. She says it is a rectangle. Is she correct? What shape is it?

4 A road sign is shaped like a regular shape with 8 sides. What is this shape called? How many vertices does it have?

- Shape name

Reasoning

5 True or False?

- "All 2D shapes have straight sides."
- "A shape with 4 sides is always a square."
- "A circle has 0 vertices."
